INTRODUCTORY

The eighteenth edition of the Baltimore Business Directory, herewith presented, speaks so well for itself that the discriminating public will see at once that it is, as always, complete, accurate and up to date.

The departments are better, because we are constantly improving them. New and valuable additions and improvements have been made, and all the information contained has been recently procured and corrected to the latest possible date. This epitome of the business interests of the city contains the names and locations of Banks, Corporations, Insurance Companies, Newspapers, Railroads, Manufacturers, etc. Every profession, occupation and trade is fully represented and classified accordingly, so that the names and numbers of persons engaged in any occupation may be seen at a glance.

The regular appearance of the Business Directory and the steady growth in the quota of advertisers is the most positive evidence of the appreciation which our efforts have had at the hands of those who should know best whether or not the publication is faithfully fulfilling its duties to the City it represents, and the publishers desire to express their thanks to the enterprising business men who have joined with them.

R. L. POLK & CO., of Baltimore, Publishers,

BALTIMORE CITY

STREET DIRECTORY.

Revised and Corrected Up to January 1st, 1905.

By the decimal system of numbering houses one hundred numbers are allotted to each square, commencing at CHARLES STREET running EAST and WEST and at BALTIMORE STREET running NORTH and SOUTH. All other streets not commencing at either of the above points are numbered in accordance with this system. By this system Even Numbers are invariably found on the North and West side of Streets, and Odd Numbers on the South and East side. The following classification and arrangement of Streets forms a diagram for each Street, giving its starting point, intersections and numbers, and will be found of great utility in finding special locations. From this list the location of any number on a Street can be ascertained; as, for instance, wishing to know at what part of Dolphin Street No. 317 comes, look at Dolphin Street and you will find that Linden Avenue runs from 303 and Eutaw Place 329, showing that No. 317 Dolphin Street is between Linden Avenue and Eutaw Place.

ABBREVIATIONS.—After the name of a Street, the word street is omitted; Al—alley, Av—avenue, Bldg—building, Ct—court, E—east, La—lane, N—north, Pl—place, Rd—road, S—south, Sp—space, Sq—square, Ter—terrace, W—west, Whf—wharf.
